> Your business already has a foundation online. The recommendations below focus on improvements that can help visitors trust your business, contact you more easily, and convert into enquiries.

Executive Summary

After reviewing your website and online presence, I identified a few opportunities that could improve your customer experience and make it easier for potential clients to contact your business.

Most of these improvements are straightforward to implement but can have a noticeable impact on credibility and lead generation.

Findings

1. First Impression

Status: 🟡 Needs Improvement

Observation:

> The homepage doesn't immediately communicate what your business does within the first few seconds.

Potential impact:

Visitors may leave before understanding your services.

Recommendation:

Use a stronger headline, clearer service positioning, and a visible call-to-action.

---

2. Mobile Experience

Status: 🟢 Good

Observation:

The website is generally usable on mobile devices.

Potential improvement:

Improve spacing and button sizes to make navigation easier on smaller screens.

---

3. Contact Experience

Status: 🔴 Critical

Observation:

There is no clear path for visitors to contact your business quickly.

Potential impact:

Lost enquiries.

Recommendation:

Add:

- WhatsApp button
- Contact form
- Sticky call button
- Better contact section

---

4. Trust Signals

Status: 🟡 Needs Improvement

Observation:

The website could better demonstrate credibility.

Suggestions:

- Recent projects
- Client logos
- Testimonials
- Google Reviews
- Company statistics
- Professional imagery

---

5. Website Speed

Status: 🟡 Moderate

Observation:

Images and assets could be optimized further.

Potential impact:

Slower loading times and reduced user experience.

Recommendation:

Compress images and optimize loading.

---

6. Search Visibility (SEO)

Status: 🟡 Needs Improvement

Possible opportunities:

- Better page titles
- Improved meta descriptions

- Clear heading structure
- Internal linking
- Local SEO improvements
